

PRODUCT INFORMATION

SEALER

Seals and gaskets keep oil where it belongs, in the engine. Over time these seals and gaskets can shrink and harden, becoming less pliable and allowing the engine's oil to seep and leak. This can compromise the health of your car and lead to expensive repairs.

BENEFITS

NGEN Sealer's special formula contains a synthetic conditioner that restores elasticity, eliminating or reducing oil leaks. This chemistry will not clog passageways and is compatible with all motor oils.

One pour does more!™

DIRECTIONS

Add 1 bottle to crankcase. Do not overfill. Most leaks stop within 100 miles. Use every oil change or as needed.

PART#	QUANTITY	SIZE
